

Bryan Chacosky

Senior Software Engineer

bryanchacosky@gmail.com | <https://linkedin.com/in/bryanchacosky> | San Francisco, CA

Summary

Senior software engineer with 10+ years of experience in developing multi-platform games and apps using a diverse set of technologies. Highly effective in individual contributor roles with the opportunity to make a strong impact.

Professional Experience

Senior Software Engineer at OkLetsPlay

September 2019 - Present

- Developing the OkLetsPlay app, a cross-platform app for mobile, desktop, and web, hosting esports tournaments and custom cash matches.
- Leading front-end development, contributing over 80% of the codebase post-hire.
- Adapting to ever-changing business and community needs to provide the best possible experience for our users.
- Realizing UI/UX mockups in app to satisfy design and business requirements.
- Learning functional and data-driven programming in a professional environment.

Senior Software Engineer at Monomi Park

January 2019 - September 2019

- Developed Slime Rancher, a cross-platform game for PC, Xbox, and Playstation.
- Led development on Viktor's Experimental Update, Slime Rancher's most positively reviewed major update on Steam.
- Realized core gameplay features and performed an integral role in each update.
- Empowered designers to rapidly iterate using custom tools and workflows.

Software Engineer at Monomi Park

November 2017 - December 2018

- Led development on Mochi's Megabucks Update and The Automatic Update, improving Slime Rancher's overall reviews to 98% positive.
- Collaborated directly with designers and artists daily to design, develop, and iterate.
- Advocated for improvements in automation, tooling, and engineering best practices.

Software Engineer II at Tinyco, Inc.

June 2016 - October 2017

- Developed Marvel: Avengers Academy, Futurama: Worlds of Tomorrow, and more, which amount to ~50 million installs across Android and iOS.
- Optimized the manual testing process by working directly with QA to automate tests, reducing the required tests duration and improving accuracy.

Game Engineer at Minogames, Inc.

June 2015 - May 2016

- Developed Mino Monsters 2: Evolution, a cross-platform game for Android, iOS, and web, written in Haxe.
- Helped stabilize, add native mobile support, and ship the game live within 3 months of starting at the company.

Game Engineer at Three Rings Design (SEGA)

January 2014 - May 2015

- Developed Super Monkey Ball Bounce and more, for Android and iOS, using Java.
- Contributed to the multi-platform game engine and custom tooling.

Lead Mobile Engineer at BrickSimple, LLC.

January 2011 - December 2013

- Developed, designed, and maintained native Android and iOS apps for clients.
- Led development on Appets, a social simulation game published by Ohio Art.
- Oversaw client needs as the sole developer on most projects.

Education

DigiPen Institute of Technology

2006 - 2010

B.S. in Real-Time Interactive Simulation

Minors in Mathematics and Physics

Additional Skills

Languages: Clojure, ClojureScript, C#, C++, Objective-C, Java, Haxe

General: Unity, iOS, Android, React, Git, MongoDB, Automated Testing

Soft: Team Collaboration, Self-motivated, Dependability, Problem-solving
